

## Plastic part and mould design 2004 categories:

### "external plastic part and mould design with less than 100 employees"

Mould design and construction plays a very important role in the creation of value. It determines production costs and its quality, and the "time to market" issue.

Thus the paramount goal of plastic part and mould design is to match the complex needs of customers, contractors, employees and investors. Anyone who wants to be able to compete and lead the competition has to prove excellence strategy wise and operationally.

That`s why we have decided to compete. First of all we went through a benchmarking process along with another 220 German companies. 58 out of these 220 companies were chosen to be analysed even further. Eventually eight final players remained that were categorized according to four different issues:

- internal plastic part and mould design with max 100 employees
- external plastic part and mould design with max 100 employees
- internal plastic part and mould design over 100 employees
- external plastic part and mould design with over 100 employees

We got the price "**tool construction of the yearly 2004**" on 28. September in the category "**external tools and building of forms among 100 coworkers**" against take.
